

How Counselors Help Our School

Elementary Counseling

Elementary School counselors help children succeed in school and life by teaching skills for learning, friendship, health and safety. We strive to help children by promoting respect for self and others, wise decision making and by practicing personal responsibility.

Elementary school counselors don't work in isolation; rather they are integral to the total educational program. They provide proactive leadership that engages all stakeholders in the delivery of programs and services to help students achieve school success. School counselors align with the school's mission to support the academic achievement of all students as they prepare for the ever-changing world of the 21st century. This mission is accomplished through the design, development, implementation and evaluation of a comprehensive, developmental and systematic school counseling program.
